No. 1 (January) pp 1–162
No. 2 (February) pp 163–262
No. 3 (March) pp 263–362
No. 4 (April) pp 363–456
No. 5 (May) pp 457–584
No. 6 (June) pp 585–700
No. 7 (July) pp 701–778
No. 8 (August) pp 779–856
No. 9 (September) pp 857–952
No. 10 (October) pp Pages 953–1050
No. 11 (November) pp 1051–1190
No. 12 (December) pp 1191–1288

Article Index (titles in italics refer to Research and technical notes)

Number 1/January

Properties of composite materials for cryogenic applications
J.B. Schutz 3
Electrical insulation of superconducting cables and coils in LHC magnets
B. Szeless 13
Epoxy resin developments for large superconducting magnets impregnation
J.M. Rey, B. Gallet, F. Kircher and J.C. Lottin 19
Characterisation of net type thermal insulators at 1.8 K low boundary temperature
B. Jenninger, G. Peón and B. Szeless 25
Large-scale tests of insulated conduit for the ITER CS coil
R.P. Reed, R.P. Walsh and J.B. Schutz 33
Properties of cold-to-warm support straps
R.P. Reed and M. Golda 39
Thermomechanical properties of ITER buffer zone candidate materials
G. P. Spellman, R. Jayakumar and R. P. Reed 43
Shear tests on adhesives for magnet collars for the LHC
M. Tavlet and L. Hominal 47
Fibre composite structures for space applications—recent and future developments
H. Bansemir and O. Haider 51
Transverse mechanical properties of glass reinforced composite materials at 4 K
D.E. Baynham, D. Evans, S.J. Gamage, R.J.S. Greenhalgh, D. Morrow and S.J. Robertson 61
Fracture mechanical characterization of fibre reinforced plastics in the intralaminar crack opening mode (mode I) and in the shear mode (mode II)
K. Humer, E.K. Tschegg, S.M. Spießberger and H.W. Weber 69
Fatigue behaviour of composites
G. Hartwig, R. Hübner, S. Knaak and C. Pannkoke 75
Reactor irradiation effects on the ultimate tensile and the interlaminar shear strength of carbon fibre reinforced epoxies at 77 K
S.M. Spießberger, K. Hümer, E.K. Tschegg, H.W. Weber and H. Gerstenberg 79
Effects of γ-radiation on mechanical behaviour of carbon/epoxy composite materials
J.M. Pintado and J. Miguel 85
Low-temperature fast-neutron and gamma irradiation of alumina
J. Megusar 91
Parameters influencing the thermal expansion of polymers and fibre composites
G. Baschek and G. Hartwig 99
Influence of hydrostatic pressure on the thermal properties of polymers at low temperatures
M. Jäckel, F. Weise, J. Opitz and R. Geilenkeuser 105
Experimental investigation of thermal properties and Grueneisen parameter of aligned polycarbonate at low temperatures
U. Escher, F. v. Schoenebeck, M. Jäckel and A. Gladun 109
Polyurethane rigid foam, a proven thermal insulating material for applications between +130°C and −196°C
A. Demharter 113
Low-temperature resistant, elastic adhesives and sealants for gas tank insulation
R. Karrer 119
Cryotanks in future vehicles
R. Heydenreich 125
Study on the development of composite CNG pressure vessels
B.S. Kim, B.H. Kim, J.B. Kim and C.R. Joe 131
Helium permeation in composite materials for cryogenic application
S. Disdier, J.M. Rey, P. Pailler and A.R. Bunsell 135
Gas permeation of fibre reinforced plastics
J. Humpenöder 143
The permeability of resin based composite materials to radiolytic gases
D. Evans and R.P. Reed 149
Efficient prepreg recycling at low temperatures
K. Pannkoke, M. Oethe and J. Busse 155

Number 2/February

Performance tests of Bi-2212 pancake coils fabricated by a lamination method
H. Kumakura, H. Kitaguchi, K. Togano, T. Hasegawa and Y. Hikichi 163
Numerical simulation and experimental verification of the

oscillating flow in pulse tube refrigerator
Y. Ju, C. Wang and Y. Zhou 169
Determination of critical current density in high temperature superconducting thin films in case of inductive measurements
E. Nazarova and A. Angelow 177
High field performance tests for Bi-2212 magnets with 30 mm bore
H. Kitaguchi, H. Kumakura, K. Togano, M. Okada, K. Tanaka and J. Sato 181
Properties of the commercially available magnetoresistive sensor KMZ10A in the temperature range between 50 and 290 K
G. Kaiser, M. Thürk, P. Seidel, F. Dettmann and U. Loreit 187
Flow channeling effect on a regenerator's thermal performance
Z.-C. Chang and P.-H. Chen 191
Numerical simulation of fluxoid dynamics in low Tc and high Tc superconductors
K. Takase, K. Demachi and K. Miya 197
Current distribution in multilayer power-law cryoconductors
L. Dresner 205
Development of a 500 kVA-class oxide-superconducting power transformer operated at liquid-nitrogen temperature
K. Funaki, M. Iwakuma, K. Kajikawa, M. Takeo, J. Suehiro, M. Hara, K. Yamafuji, M. Konno, Y. Kasagawa, K. Okubo, Y. Yasukawa, S. Nose, M. Ueyama, K. Hayashi and K. Sato 211
Magnetoresistance below 1 K and temperature cycling of ruthenium oxide–bismuth ruthenate cryogenic thermometers
R.G. Goodrich, D. Hall, E. Palm and T. Murphy 221
Thermal conductivity of a RTV silicone elastomer between 1.2 and 300 K
A. Baudot, J. Mazuer and J. Odin 227
Fuzzy control on the phase and stroke of a linear compressor of a split-Stirling cryocooler
Y.-P. Yang and B.-J. Huang 231
RF transmission line for cryogenic applications
R. Wedenig, Ch. Knoblauch and T.O. Niinikoski 239
Thermodynamic investigations of optimum active magnetic regenerators
A. Smaïli and R. Chahine 247
Influence of antraquinone inclusions on the thermal properties of epoxy resins at low temperatures
L.E. Evseeva and S.A. Tanaeva 253
Fabrication of high current carrying Bi-2212/Ag superconducting tapes by the pre-annealing and cold rolling process
H. Miao, H. Kitaguchi, H. Kumakura and K. Togano 257

Number 3/March

Development of cryogenic loop heat pipes
R. Chandratilleke, H. Hatakeyama and H. Nakagome 263
The application of the Deiters equation of state to the estimation of the solubility of solidified substances in liquid nitrogen by the Preston–Prausnitz method
B. Dabrowska 271
Substrate effects on thermal instability development in high T_c superconducting thin films with transport current
N.A. Buznikov, A.A. Pukhov and V.N. Skokov 277
Tensile strain/transverse compressive stress dependence of critical current in Bi(2212) superconducting tapes with Zr-reinforced Ag sheath
K. Katagiri, K. Kasaba, Y. Shoji, T. Takahashi, K. Watanabe, K. Noto, T. Okada, M. Hiraoka and S. Yuhya 283
Simple continuous level meter for cryogenic liquids
M. Medeova, V. Pavlík and P. Skyba 289
Two-channel DC-SQUID picovoltmeter for the measurement of low-field Hall coefficient and electrical resistance from 4.2 to 100 K
F. Sachslehner 293
Magnetic field dependence of the sensitivity of a type E (chromel–constantan) thermocouple
A.V. Inyushkin, K. Leicht and P. Esquinazi 299
Coupling current loss reduction in cable-in-conduit superconductors by thick chromium oxide coating
K. Kwasnitza and St. Clerc 305
Critical current density and microstructure of NbTi/Nb/Cu superconducting multilayer sheet
H. Otsuka, M. Sugiyama, I. Itoh and M. Sawamura 309
A self-contained ^{3}He refrigerator suitable for long duration balloon experiments
S. Masi, E. Aquilini, P. Cardoni, P. de Bernardis, L. Martinis, F. Scaramuzzi and D. Sforna 319
Prospects for Peltier cooling of superconducting electronics
R.P. Huebener and C.C. Tsuei 325
Thermodynamical aspects of pulse tubes II
A.T.A.M. De Waele, P.P. Steijaert and J.J. Koning 329
Small scale ^{4}He liquefaction using a two-stage 4 K pulse tube cooler
G. Thummes, C. Wang and C. Heiden 337
Heat removal in the orifice pulse-tube
P. C. T. de Boer 343
Reduction of the effects of asymmetrical convection in tilted pulse-tube refrigerators
R. G. Scurlock and C. Beduz 359

Number 4/April

Test method and strength characteristics of alumina ceramics at cryogenic temperatures
N. Suzuki, T. Uchida and K. Suzuki 363
Interfilament coupling loss for protection of superconducting multicoil magnets
K. Takeuchi, Y.K. Kang, H. Hashizume and Y Iwasa 367
Magnetoresistance of the new ceramic "Cernox" thermometer from 4.2 K to 300 K in magnetic fields up to 13 T
G. Heine and W. Lang 377
Energy dissipation and temperature rise associated with crack extension in a woven glass-epoxy laminate at low temperatures
S. Ueda and Y. Shindo 381
Voltage spikes observation in superconducting Cable-In-Conduit Conductor under ramped magnetic fields. Part 2: Analysis of loop inductances and currents cariations associated with the spikes
V. S. Vysotsky, M. Takayasu, S. Jeong, P.C. Michael and V.V. Vysotskaia 387
Effect of thermal cycles on thermal expansion of silver-sheathed Bi2223 tape at 10—310 K.

N. Yamada, K. Nara, M. Okaji, T. Hikata, T. Kaneko and N. Sadakata 397
Low-temperature viscoelastic behavior of unidirectional carbon composites
Z. Zhang and G. Hartwig 401
Miniature 10-150 mW Linde-Hampson cooler with glass-tube heat exchanger operating with nitrogen
H.J. Holland, J.F. Burger, N. Boersma, H.J.M. ter Brake, H. Rogalla 407
Coupled heat transfer and thermal stress in high-T_c thin-film superconductor devices
B. Gu, P.E. Phelan and S. Mei 411
'Electromaglev' ('Active-Maglev') — magnetic levitation of a superconducting disk with a DC field generated by electromagnets: Part 2. Theoretical and experimental results on lift-to-weight ratio and lateral stiffness
H. Lee, M. Tsuda and Y. Iwasa 419
Improvements and validation of the null calorimetric method for A.C. loss measurements in superconducting
P. Dolez, J. Cave, D. Willén , W. Zhu and M. Aubin 429
Design and flight performance of a space borne ^{3}He refrigerator for the infrared telescope in space.
M.M. Freund, L. Duband, A.E. Lange, T. Matsumoto, H. Murakami, T. Hirao and S. Sato 435
Quench study and helium transport in tightly wound coils
X. Huang 445
Forward current–voltage characteristics of light-emitting diodes at low temperatures.
H. Akimoto, A. Marchenkov, R. Jochemsen and G. Frossati 451
Low temperature thermal characteristics of thin-film Ni–Cr surface mount resistors.
G. Ventura, L. Lanzi, I. Peroni, A. Peruzzi and G. Ponti 453

Number 5/May

Foreword
C.A.Luongo 457
QUELL experiment: analysis and interpretation of the quench propagation results
A. Anghel 459
The QUELL experiment as a validation tool for the numerical code Gandalf
C. Marinucci, L. Bottura, G. Vécsey and R. Zanino 467
Analysis of the QUELL experiment and comparisons with numerical simulations (QUENCHER)
A. Shajii, S.P. Smith, S. Pourrahimi and J.P. Friedberg 479
Stability and protection of CICCs: an updated designer's view
L. Bottura 491
Forced flow He II cooling for superconducting magnets—design considerations
S.W. Van Sciver 503
Evaluation of magnet losses from He II temperature measurements in TORE SUPRA
J.-L. Duchateau and Ph. Riband 513
Operation limits of the EURATOM LCT coil at He II temperature
R. Heller, M. Darweschsad, S. Fink, G. Friesinger, W. Herz, W. Maurer, G. Nöther, G. Schleinkofer, M. Süsser, A. Ulbricht, F. Wüchner and G. Zahn 519
Mithrandir+ : a two-channel model for thermal-hydraulic analysis of cable-in-conduit super-conductors cooled with helium I or II
R. Zanino, L. Bottura, L. Savoldi and C. Rosso 525
Thermohydraulics of quenches and helium recovery in the LHC prototype magnet strings
M. Chorowski, P. Lebrun, L. Serio and R. van Weelderen 533
Overview of current distribution and re-distribution in superconducting cables and their influence on stability
N. Amemiya 545
Extra AC losses for a CICC coil due to the non-uniform current distribution in the cable
T. Mito, K. Takahata, A. Iwamoto, R. Maekawa, N. Yanagi, T. Satow, O. Motojima, J. Yamamoto, F. Sumiyoshi, S. Kawabata and N. Hirano 551
Influence of current re-distribution on minimum quench energy of superconducting triplex cable against local disturbance
N. Amemiya, H. Yonekawa, T. Ogitsu, E. Kobayashi, K. Sasaki, N. Ohuchi, K. Tsuchiya and K. Miyashita 559

Number 6/June

Heat transfer in the thermally developing region of a laminar oscillating pipe flow
Dae-Young Lee, Sang-Jin Park and Sung Tack Ro 585
A new approach to the design of passive magnetic bearings using high-temperature superconductors
A.V. Filatov, O.L. Poluschenko and Sung-Chul Shin 595
Measurement of characteristic time for quantized vortex tangle development in He II
Takeshi Shimazaki, Masahide Murakami and Takashi Kanari 601
Pancake coils made from Bi-2223/Ag tapes
P. Verges, K. Fischer, A. Hütten and G. Fuchs 607
Operation of a bipolar transistor with a tunnel MOS emitter and an induced base from 4.2 to 300 K
I.V. Grekhov, K. Schmalz, A.F. Shulekin, K. Tittelbach-Helmrich and M.I. Vexler 613
Waiting time effect of a GM type orifice pulse tube refrigerator
Shaowei Zhu, Yasuhiro Kakimi and Yoichi Matsubara 619
First experimental investigations on a thin film Hall magnetometer with a high temperature superconducting pick-up antenna
G. Kaiser, S. Linzen, H. Schneidewind, U. Hübner and P. Seidel 625
Steady-state transition boiling on thin wires in liquid nitrogen. The role of Taylor wavelength
Marie-Christine Duluc and Maurice-Xavier François 631
Performance tests of Bi-2223 pancake magnet
H. Kumakura, H. Kitaguchi, K. Togano, H. Wada, K. Ohkura, M. Ueyama, K. Hayashi and K. Sato 639
Scaling law for velocities of normal phase propagation over high T_c superconducting films with transport current
N.A. Buznikov and A.A. Pukhov 645
Experimental study of the oscillating flow characteristics for a regenerator in a pulse tube cryocooler
Yonglin Ju, Yan Jiang and Yuan Zhou 649
Stresses in a long isotropic solenoid with longitudinally non-uniform

external loads
E.A. Deviatkin 657
On-orbit performance of $YBa_2Cu_3O_{7-x}$ thick films
M.W. Hooker and S.A. Wise 665
An accurate differential pressure gauge for use in liquid and gaseous helium
Chris J. Swanson, Kris Johnson and Russell J. Donnelly 673
Hot end loss at pulse tube refrigerators
J. Gerster, M. Thürk, L. Reißig and P. Seidel 679
Energy dissipation due to fracture of a beam at low temperature
S. Ueda and Y. Shindo 683
Effects of DC gas flow on performance of two-stage 4 K pulse tube coolers
C. Wang, G. Thummes and C. Heiden 689
Quality factors of coplanar niobium resonators on $LaAlO_3$ substrates with different cross-sectional geometries
G. Benz, T.A. Scherer, M. Neuhaus and W. Jutzi 697

Number 7/July

Pressure effect on the heat transfer in bath of superfluid helium
R. Z. Wang and P. Zhang 701
Boiling heat transfer to liquid nitrogen from structured surface with organic fibre net insulation in narrow channel
S.S. Ivanov and I.O. Shchegolev 707
Instability of heat transfer from HTSC-samples to liquid nitrogen
V.I. Deev, K.V. Kutsenko, A.A. Lavrukhin, A.O. Komarov and S.A. Voronkov 715
Prediction of the Joule-Thomson inversion curve of air from cubic equations of state
C.M. Colina and C. Olivera-Fuentes 721
Thermodynamic optimization of conduction-cooled HTS current leads
H.-M. Chang and S.W. Van Sciver 729
Hydraulic characterization of centrifugal pumps in He I near saturated conditions
B. Baudouy, M. Takeda and S. W. Van Sciver 737
Electromaglev ("active-maglev") — magentic levitation of a superconducting disk with a DC field generated by electromagnets: Part 3. Theoretical results on levitation height and stability
M. Tsuda, H. Lee and Y. Iwasa 743
Acoustic quality factor of 95%-density molybdenum and its application to high frequency cryogenic gravity-wave antennas
W. Duffy Jr and M. Bassan 757
Analytical expressions of AC magnetic susceptibility for some critical state models of superconductor
Y. Kimishima 763

Number 8/August

Transition of flux pinning mechanism in mesoscopic NbTi/Nb/Cu superconductor
T. Kitai, H. Tsurumaru, M. Higuchi, K. Osamura, S. Kikuchi and H. Otsuka 779
Temperature dependence of critical current density of Nb_3Al multifilamentary wires fabricated by Nb-tube and its improved processes
T. Kuroda, Y. Murakami, K. Itoh, M. Yuyama, H. Wada and D. Mao 785
Second law analysis of a plate heat exchanger with an axial dispersive wave
S.K. Das and W. Roetzel 791
Stresses in matrix and coated cylindrical inclusion from twisted multifilamentary superconductor with transport current in external magnetic field
E.A. Deviatkin 799
Work loss in double-inlet pulse tube refrigerators
S. Zhu, S. Kawano, M. Nogawa and T. Inoue 803
Effect of current sweep rate on critical current of superconducting Ag-Bi-2223 tapes
S.Y. Ding, C. Ren, X.X. Yao, Y. Sun and H. Zhang 809
Experimental research of thermoacoustic prime mover
S. Zhou and Y. Matsubara 813
Normal-zone propagation properties in Bi-2223/Ag superconducting multifilament tapes
S.B. Kim, A. Ishiyama, H. Okada and S. Nomura 823
Response to transient heat load in a helium II loop operated with a self-driven thermomechanical pump
S. Kasthurirengan and A. Hofmann 833
Design of an A.C. susceptometer based on a cryocooler
Ph. Vanderbemden 839
Control of DC gas flow in a single-stage double-inlet pulse tube cooler
C. Wang, G. Thummes and C. Heiden 843
Magnetocaloric properties of the $La_{0.7-x}Y_xSr_{0.3}MnO_3$ giant magnetoresistance ceramics
T.K. Bose, R. Chahine, B.R. Gopal, M. Foldeaki, A. Barman, M. Gosh, S.K. De and S. Chatterjee 849
Rotating feed-through for cryogenic fluid
J.L. Lizon 855

Number 9/September

Application of matrix heat exchangers to thermomechanical exergy recovery from liquid hydrogen
V. Ahuja and R. Green 857
Characteristics of friction factor of gas flowing through small rectangular ducts
H.L. Mo 869
A small-scale experiment demonstrating the current lead resistance method of preventing a current imbalance
S. Yamaguchi, K. Seo and M. Morita 875
Influence of thermal boundary resistance on bolometric response of high-T_c superconducting films
J.-P. Wu, C.-H. Shih and H.-S. Chu 881
Characteristics of NbTi mechanical persistent current switch and mechanism of superconducting connection at contact
S. Ohtsuka, H. Ohtsubo, T. Nakamura, J. Suehiro and M. Hara 893
Ramp rate limitation in AC multi-strand superconducting cable due to statistical scattering in inductive coupling between strands
V.R. Romanovskii 903
Point contact tunnelling apparatus with temperature and magnetic field control
L. Ozyuzer, J.F. Zasadzinski and K.E. Gray 911
A simple method for measuring the low temperature thermal

conductivity in thin wires
G. Ventura, A. Bonetti, E. Gottardi, L. Lanzi, I. Peroni, A. Peruzzi and G. Ponti 917
Vapor–Liquid Phase separation of He II
S.W.K. Yuan, A.R. Urbach, S.M. Volz and J.H. Lee 921
Performance degradation due to longitudinal heat conduction in very high NTU counterflow heat exchangers
S. Pradeep Narayanan and G. Venkatarathnam 927
Influence of quench-induced thermal bubble disturbance on insulation performance of liquid helium for superconducting power apparatus
S. Chigusa, Y. Taniguchi, N. Hayakawa and H. Okubo 931
About a new type of closed-cycle cryocooler operating by use of the Bernoulli effect
G. Kaiser, L. Reißig, M. Thürk and P. Seidel 937
A 4.2K CMOS optical detector
E.A. Gutiérrez, S.V. Koshevaya and M.J. Deen 943
A simple, low-cost burst disc for use at cryogenic temperatures
T. More and K. Johnson 947
Miniature magnetoresistance probe for high-field mapping
J.S. Xia, N.S. Sullivan and E.D. Adams 949

Number 10/October

Experimental analysis of thermalisation and emissivity of radiation screens for cryostat design
G. Peón, A. Camón, E. Martínez, C. Rillo, J. Sesé and R. Iturbe 953
Compactness factors for rolled, stacked-screen regenerative heat exchangers
Tim Murphy and W. Jerry Bowman 959
Improved cooling performance of HeII channels separated by a porous spacer
T. Okamura, S. Hamaguchi, T. Okada and S. Kabashima 967
Temperature, current and field dependencies of activation energy in $Tl_2Ba_2CaCu_2O_8$ superconducting thin film
X.N. Xu, A.M. Sun, S.A. Aruna, S.Y. Ding, X. Jin, X.X. Yao, S.L. Yan and H.H. Wen 971
Noncontact measurement of transient potential distribution in superconducting cable
H. Shimizu, K. Taketa, Y. Yokomizu and T. Matsumura 977
Cryogenic mechanical properties of Gore-Tex® fabric
David E. Glass 983
An evaluation of the inlet flow reduction for a cable-in-conduit conductor in pulsed operation
Makoto Sugimoto, Takaaki Isono, Kiyoshi Yoshida, Hiroshi Tsuji, Ichiro Takano, Takataro Hamajima, Kimiyuki Shinoda and Takashi Satow 989
Regenerator dynamics in the harmonic approximation
A.T.A.M. de Waele, H.W.G. Hooijkaas, P.P. Steijaert and A.A.J. Benschop 995
Critical current density of superconductors as a function of strain in high magnetic fields
H.A. Hamid and D.P. Hampshire 1007
Time constant measurement in technical superconductors
Ludovit Krempasky and Curt Schmidt 1017
Investigations on protective coatings for high temperature superconductor thick films
Marco Vanolo and Franco Pavese 1031
Two step phase transition model of heat transfer in bath of subcooled superfluid helium
R.Z. Wang and H. Kobayashi 1035
A simple contactless apparatus for determination of critical transition temperature of high-Tc superconducting films
S.S. Tinchev 1039
Conduction heat leak of HTc superconducting tapes from 55 K to 4 K
C. Wang, G. Thummes and C. Heiden 1041
Announcement 1043

Number 11/Noven:ber

Preface 1051
Electrical insulation specification and design method for superconducting power equipment
M. Hara and J. Gerhold 1053
Properties of cryogenic insulants
J. Gerhold 1063
Electrical insulation characteristics of superconducting power apparatus
M. Hara and H. Okubo 1083
Solid insulation and its deterioration
M. Kosaki, M. Nagao, N. Shimizu and Y. Mizuno 1095
Mechanical influence on long-term dielectric performance of insulants
S. Nishijima and M. Hara 1105
High-voltage testing of superconducting power apparatus
SW Schwenterly 1115
The electrical insulation system of a forced flow cooled superconducting (sc) magnet
K. Bauer, S. Fink, G. Friesinger, A. Ulbricht and F. Wüchner 1123
Specifications and performance experiences of internally cooled small-scale SMES
T. Hamajima, K. Kitamura, M. Sakai and T. Satow 1135
Specifications and performance experience of pool boiling cooled magnets
T. Satow 1145
Review of the electrical insulation of superconducting generators
Itaru Ishii 1155
Review of the research and development for insulation of superconducting fault-current limiters
H. Mitsuii 1159
630 kVA high temperature superconducting transformer
H. Zueger 1169
Cryogenic electrical insulation of superconducting power transmission lines: transfer of experience learned from metal superconductors to high critical temperature superconductors
J. Gerhold and T. Tanaka 1173

Number 12/December

Rayleigh–Bénard convection at very high Rayleigh numbers close to the ^{4}He critical point
X. Chavanne, B. Castaing, B. Chabaud, F. Chill and B. Hébral 1191
Thermodynamic analysis of Collins helium liquefaction cycle
M.D. Atrey 1199
Magnetic field dependence of transition current of NbTi mechanical PCS
S. Ohtsuka, T. Nakamura, D. Tsuji, J. Suehiro and M. Hara 1207
Enthalpy flow rate of a pulse tube in

pulse tube refrigerator
S. Zhu and Z. Chen 1213
Re-evaluation of the intercept temperature for HTS current leads based on practical and economical considerations
Christopher M. Rey 1217
AC loss properties of some Bi:2212/Ag Rutherford cables and a comparison with those of cables wound with NbTi and Nb_3Sn
M.D. Sumption, R.M. Scanlan and E.W. Collings 1225
Electrical resistivity and thermoelectric power of polycrystalline and amorphous Se-Te-Cu system
K. Balcerek, R. Wawryk, Cz. Marucha, K. Durczewski and Z.G. Ivanova 1233
Magnetothermal transition in YBCO melt textured materials
L. Porcar, D. Bourgault, J.M. Barbut, X. Chaud .and R Tournier 1237
Transient response of perforated plate matrix heat exchangers
P. Ramesh and G. Venkatarathnam 1243
Magnetic field orientation dependence of critical current in industrial Nb_3Sn strands
T. Schild and H. Cloez 1251
An experimental study of heat transfer characteristics of a two-phase nitrogen thermosyphon over a large dynamic range operation
A. Nakano, M. Shiraishi, M. Nishio and M. Murakami 1259
Research and technical note: calculation of the internal energy of neon, argon, krypton and xenon at their critical points using a thermomechanical model
S.A. Ulybin, V.I. Sukhov and V.D. Chernetsky 1267
